DN SOLUTIONS

PUMA AW 560/MF II · 660 II

The PUMA AW560 II / 660 II / 560MF II models represent the next generation, high-productivity wheel processing turning centers that provide customers with powerful and stable cutting capabilities and high-efficiency chip disposal.

POWERFUL CUTTING CAPABILITIES AND LARGE MACHINING AREAS

Rigid structures, large envelopes and powerful spindles enable the machining of a wide variety of different-sized aluminum wheels.

ENHANCED CHIP DISPOSAL AND MAINTENANCE EFFICIENCY

Enhanced chip disposal and efficient lubrication system, and simple maintenance of air units.

HIGH-SPEED AND HEAVY-DUTY CUTTING CAPABILITIES

The high-power, high-torque spindle enables accurate high-speed machining and heavy-duty machining at low speed to be undertaken.

BASIC STRUCTURE | MACHINING AREA

The PUMA AW II machines are user-friendly and, in addition to their enhanced cutting capabilities, provide customers with highly efficient chip disposal.

Optimized for the machining of aluminum alloy wheels, PUMA AW II machines, with their anti-vibration structures, deliver high accuracies.

The MF model is capable of producing mirror-like surface finishes with extremely low surface roughness.

	Z축	m/min (ipm)		20 (787.4)	

MACHINING AREA

The machines in the series have large machining areas for processing a wide variety of aluminum wheel sizes.

SPINDLE | TURRET

The powerful, high-torque spindle provides high accuracy cutting at high speeds and heavy-duty cutting at low speeds. The MF model has a built-in spindle that delivers superior surface finishes.

There is a high risk of fire when using non-water-soluble cutting fluids, processing flammable materials, neglecting the controlled and careful use of coolants and modifying the machine without the consent of the manufacturer. Always check the SAFETY GUIDELINES carefully before using the machine.

PERIPHERAL EQUIPMENT

Shower Coolant OPTION

The shower coolant washes workpiece with coolant sprayed from above.

Oil Skimmer OPTION

The oil skimmer keeps coolant and lubricant isolated from each other to extend the lifecycle of coolant.

Chuck Coolant OPTION

The chuck coolant removes chips on the chuck and jaws to facilitate contact between the workpiece and the chuck.

Coolant chiller (Recommendation) OPTION

Coolant chiller is highly recommended to prevent temperature rise and minimize thermal deformation, when using a water-insoluble coolant or high-pressure coolant system of which the power is over 1.5 kw.

Quick change CAPTO OPTION

The quick change tool system simplifies tool change operations. Recommended for users who need to change tools frequently or to reduce set-up times.

Dust Collector OPTION

The dust collector absorbs airborne oil vapor and fine dust in the system to improve working environment.

Work & Tool Counter OPTION

The counter counts daily and cumulative works, tool usage, etc.

Power Panel Air Conditioner OPTION

When a machine operates in a hot environment, this device regulates the temperature inside of power panel to prevent the panel from malfunctioning owing to the of temperature fluctuation.

Signal Tower OPTION

Device to show present statuses of the machine.

DN SOLUTIONS FANUC i PLUS

DN Solutions Fanuc i Plus maximizes customer productivity and convenience.

15" Screen + New OP

DN Solutions Fanuc i Plus' operation panel enhances operating convenience by incorporating common-design buttons and layout. It features a Qwerty keyboard for fast and easy data input and operation.

DN Solutions Fanuc i Plus

- 15-inch color display
- Intuitive and user-friendly design

USB and PCMCIA card QWERTY keyboard

- EZ-Guide i standard
- Ergonomic operator panel
- 2MB Memory
- Hot keys

iHMI touchscreen OPTION

iHMI provides an intuitive interface that uses a touchscreen for quick and easy operation.

Range of applications

Providing various applications related to planning, machining, improvement and utility, for customer convenience.

CUSTOMER SUPPORT AND SERVICES

We're there for you whenever you need us.

We help our customers operate at maximum efficiency by providing them with a range of tried, tested and trusted services - from pre-sales consultancy to post-sales support.

Field services

- On-site service
- Machine installation and testing
- Scheduled preventive maintenance
- Machine repair service

Parts supply

- Supplying a wide range of original DN Solutions spare parts
- Parts repair service

Training

- Programming, machine setup and operation
- Electrical and mechanical maintenance
- Applications engineering

Technical support

- Supports machining methods and technology
- Responds to technical queries
- Provides technical consultancy
